

# NEW RANGE OF ALYA EMERGENCY LUMINAIRES

**ZEMPER'S ADAPTIVE EVACUATION MANAGEMENT SYSTEM.**

*Zemper launches the new Alya emergency lighting family. It is a new model of smaller emergency lighting, up to 60% smaller, with features that make it ideal for evacuation and anti-panic.*

The optics of Alya luminaires allow you to adapt with a single model to different applications. It is an emergency luminaire designed for connectivity, speed of installation and sustainability.

## Sustainability

Some of the characteristics that make it more sustainable than its predecessors are that it requires less maintenance, with superior efficiency that extends the life of its battery and its smaller size requires less material to manufacture.

## Connectivity

The emergency luminaire allows to work with self-test, wireless, wired or DALI systems.

## The Alya family

The Alya range is made up of three types of emergency luminaires.

**Alya**, an emergency luminaire specifically designed for use on the ceiling.

**Walya**, an emergency wall-mounted luminaire featuring a large spacing.

**Exitalia**, the part of the family designed as an exit sign that can be adapted to any position or ceiling, even in recessed ceilings. Extremely flexible, both for surface, wall or embedding.

Alya

Walya

Exitalya

Alya has the ENEC, N and CB certifications granted by the AENOR certification entity, to all the references of its Alya, Walya and Exitalya versions.
